WWEBNET, Inc.
(A DEVELOPMENT STAGE COMPANY)
Notes to the Consolidated Financial Statements for the period from July 1, 2009
to September 30, 2009 (unaudited)

Note 1 - Business description and basis of presentation

Business:

WWEBNET, Inc. ("WWEBNET") which is located in Nevada, United States of America, together with its 100% owned subsidiary, Direct Choice (TV) Communications Limited, (collectively the "Company") own, market and sell broadcast software technology to major entertainment companies, as well as other targeted industries ("Clients"). The Company's product provides a permanent link between the end consumer and the Client. Through this link the Client is able to market directly to the consumer in line with the consumer's own preferences.

The consolidated financial statements include the accounts of WWEBNET and its 100% owned subsidiary. All significant intercompany accounts and transactions have been eliminated in consolidation.

Basis of presentation

The Company is a development stage enterprise since the Company has not generated revenue from the sale of its products and its efforts from its inception on May 16, 2003 through Sept 30, 2009. The company has principally been devoted to developing its product as well as raising capital. Accordingly the financial statements have been prepared in accordance with the provisions of Statement of Financial Accounting Standard (SFAS) No. 7, "Accounting and Reporting by Development Stage Enterprises".

The Company is reporting a net loss of US\$ 448,759 for the four month period ending September 30, 2009

Note 2 - Summary of significant accounting policies

Basis of accounting:

The consolidated financial statements have been prepared in accordance with accounting principals generally accepted in the United States of America ("US GAAP").

Use of estimates:

The preparation of the consolidated financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Cash equivalents:

The Company considers all highly liquid investments with maturities of three months or less when acquired as cash equivalents.

Income taxes:

There is presently no taxation on income by the State of Nevada, USA.

Property and Equipment:

Property and equipment are stated at cost. Depreciation and amortization are computed primarily using the straight-line method over the estimated useful lives of the assets of 5 years.

Research and development:

All research and development costs are expensed as incurred and include costs of consultants who conduct research and development on behalf of the Company.

Intangible assets:

Intangible assets, consisting of goodwill, intellectual property and software are carried at cost. The Company considers the useful economic life of goodwill to be ten years commencing August 29, 2005 and the other intangible assets to be four years commencing August 29, 2005. The intangible assets are being amortized over their expected useful lives on a straight line basis.

Recognition of impairment

Impairment losses on long-lived tangible and intangible assets which do not have indefinite useful lives, such as goodwill, intellectual property, software and property and equipment, are recognized when events indicate that the undiscounted cash flows estimated to be generated by such assets are less than their carrying value and all or a portion of such carrying value may not be recoverable. Impairment losses are then measured by comparing the fair value of assets to their carrying amounts.

Foreign currency translation:

The consolidated financial statements of the Company's operations in which the functional currency is other than U.S. dollars have been translated into U.S. dollars in accordance with Statement of Financial Accounting Standards No. 52, Foreign Currency Translation. The statement provides that all balance sheet accounts are translated at year-end rates of exchange, except for equity accounts which are translated at historical rates. Income and expense accounts are translated at the average of exchange rates in effect during the period, and the resulting translation adjustment is included as a separate component of stockholders' equity and in comprehensive income or loss.

Note 3- Common stock and other units in the same class outstanding

The Company has authorized capital of 250,000,000 shares of US\$ 0.001 each, of which 150,000,000 are common stock shares of US\$0.001 and 100,000,000 are preferred stock shares of US\$0.001 each. As of Sept 30, 2009, WWEBNET, Inc. had 51,103,692 shares of common stock or other units in the same class outstanding.
